Facility ID: 8-000861

Spill Report No. 120625-03

Dear Mr. Rasmussen:

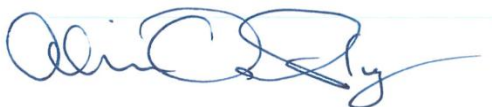

The Nevada Division of Environmental Protection (NDEP) has reviewed the October 24, 2012 Spill Report for surficial soil diesel fuel product release at the Reid Gardner Generating Station, Moapa, Nevada. The October 24, 2012 Report contains a request for a no further action determination from the NDEP. The report was prepared by NV Energy staff. This letter provides a no further action (NFA) determination for diesel contaminated soil at the site of the facility referenced above (NAC 445A.3452).

The NDEP has reviewed information contained in the Spill Report file that has been provided by NV Energy Environmental Services. Based on this review, no contaminants remain above action levels or remediation standards in soil; therefore, the NDEP has determined that no further assessment or remediation is required to be protective of human health and the environment (NAC 445A.227).

NDEP may re-evaluate this decision if conditions at the site change or if new or previously unidentified information becomes available that: 1) alters the results of the site evaluation; and 2) demonstrates a potential detrimental impact on human health or the environment.

If you have any questions or need further assistance, please contact me at 775-687-9396 or aoakley@ndep.nv.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Alison Oakley", written over a light blue horizontal line.

Alison Oakley, CEM
